

# Oklahomans For Life - LEGISLATIVE ALERT

April 14th, 2009

## Senate and House action due on HB 1326; Emails of support urgently needed

Pro-life HB 1326 is heading for floor action in both the Senate and the House at the Oklahoma Capitol.

**We need to ask you to help - even if you have already done so** - in order to achieve passage of this crucial pro-life bill.

Please send an email to key members of the Senate and House at [oklegislature@okforlife.org](mailto:oklegislature@okforlife.org). With just

**one click**, you can reach the legislators. This vital pro-life bill is at a critical stage, and messages of support are **urgently** needed. Please urge **support** for this pro-life bill, **HB 1326**.

**HB 1326** prohibits the killing of human embryos for research purposes. The bill protects embryonic human beings, living members of the human species, from being killed for their stem cells. Exploit them by treating them as raw material to be mined for parts, and we diminish ourselves as we destroy them.

**Adult** stem cells have benefited patients suffering from more than 70 different disorders. By contrast, embryonic stem cells have never benefited a single human patient. Embryo-killing stem-cell research is a misguided and ill-fated pursuit from a scientific standpoint, in addition to being the profoundly unethical act of destroying living members of our species, *homo sapiens*, in order to provide raw material for research. Please urge support for HB 1326.

**Please email legislators at [oklegislature@okforlife.org](mailto:oklegislature@okforlife.org). One click** will reach Senate and House members. Ask them to support HB 1326.

Thank you for protecting our most defenseless little members of the human family.

Tony Lauinger  
State Chairman, Oklahomans For Life
